

## Potentially Dangerous & Ineffective Exercises Explained (2 hours)

This presentation includes Paul's 11 key questions that allow you to identify a potentially dangerous exercise, the 13 most dangerous exercises, 6 ineffective exercises, and 8 common exercises that are tremendously effective but involve high risk. Paul will also provide a selection of safer and more effective exercise options.

Are you using high risk exercises in your programs?

### Presented by: Paul Wright B.App.Sc(Physio). Dip.Ed.(P.E.)

Paul Wright is one of Australia's leading health and fitness educators. His academic qualifications include a Bachelor of Applied Science (Physiotherapy), a Diploma in Education (Physical Education) and an advanced diploma in Business Management. He currently owns and operates multiple Get Active Physiotherapy clinics in Australia - some of which are located inside Fitness First Health Clubs. Paul has been actively involved in health education for more than 20 years, having lectured to over 15 000 health professionals in the areas of program design, injury prevention, and more recently in business management.

He was awarded the 2002 Australian Fitness Network Presenter of the Year and the 2004 Author of the Year.
